

MELISSA J WOMACK

7510 E Grand Ave, Apt 3322, Dallas, TX 75214
m.womack010101@gmail.com - (512) 568-5185

Summary

Master of Science graduate student at The University of Texas at Dallas in the Bioinformatics and Computational Biology – Computer Science Track. Teacher's assistant and contributing member of a research lab. Anticipated graduation date of May 2021. Focused on improving skills in programming, algorithm analysis, and data engineering. Previous military experience where I gained soft skills in teamwork, discipline, and adaptability.

Skills

- | | | |
|-------------------------------|--------------------|---------------------------|
| • C++ | • Git/GitHub | • Java |
| • Object-Oriented Programming | • Microsoft Office | • Mac OS/Linux/Windows OS |
| • JavaScript | • Node.JS | • HTML |
| • CSS | • MongoDB | • MySQL |
-

Certifications

Full Stack Web Development Certificate

July 2018 - Oct 2018

The University of Texas at Austin

- Curriculum included: MERN Stack, Agile Methodology, API Integration, Responsive Web Design, Git/GitHub, Heroku, JavaScript, jQuery, Node.JS, React.JS, HTML, CSS, MongoDB, and MySQL
 - Completed several collaborative and independent projects which can be found here:

-

Education

Master of Science in Bioinformatics and Computational Biology

Aug 2019 – Present

The University of Texas at Dallas, GPA – 3.73

Bachelor of Science in Microbiology

Aug 2015 - May of 2018

Texas State University, GPA - 3.76, magna cum laude

Relevant Coursework

- | | |
|---|---|
| • Algorithm Analysis and Data Structures | • Computer Science |
| • Combinatorics and Graph Theory | • Probability and Statistics for Data Science |
| • Advanced Calculus and Linear Algebra | • Machine Learning – Spring 2021 |
| • Web Programming Languages – Spring 2021 | • Database Design – Spring 2021 |
-

Experience

Microbiology Technician

Feb 2019 - Aug 2019

Clinical Pathology Laboratories, Austin, TX

- Processed and handled over 200 clinical samples a day while adhering to safety protocols and ensuring quality control
- Performed enzyme-linked immunosorbent assays to test for human pathogens in clinical samples
- Assisted in the identification of clinically relevant organisms using a wide array of biochemical tests

Veterinary Food Inspection Specialist

April 2007 - Oct 2015

United States Army

- Collaborated in creating and implementing a database that kept track of 9.3 million dollars of inventory
- Supervised teams of up to 6 people
- Performed the inspection of food designed for human consumption and assisted veterinarians with animal medicine
